Papers are invited which address new and previously unpublished results in the areas:

- Ad-hoc, sensor, mesh and vehicular wireless networks
- Content-centric architectures for wireless, mobile and multimedia networks
- Context-awareness in wireless, mobile and multimedia networks
- Cognitive communications and networking
- Dependability and survivability issues for wireless, mobile and multimedia networks
- Energy-efficiency for wireless, mobile and multimedia networks
- Green wireless networking
- Internet/web of things
- Localisation, tracking, and mobility management and services
- Middleware services for wireless, mobile and multimedia networks
- Mobile applications and services over 5G networks
- Mobile big data networking and services
- Mobile cloud computing
- Mobile data offloading in 5G networks
- Mobile edge computing
- Mobile health networking
- Mobile network traffic characterization and measurements
- Mobile social networks
- Modelling, analysis, and performance evaluation
- Opportunistic and delay-tolerant networks
- Participatory, mobile and urban sensing
- Resource management for QoS/QoE provisioning
- RFID, NFC, and machine-to-machine (M2M) communications
- Satellite and space networking
- Seamless inter-networking and self-organisation
- Security, trust and privacy issues for wireless, mobile and multimedia networks
- Software-defined wireless networks
- Standardization aspects of mobile network QoS and Reliability
- System prototypes, measurements, real-world deployment, and experiences
- Underwater wireless, mobile and multimedia networks
- Virtual mobile infrastructure
- Wireless BAN, PAN, LAN, MAN and WAN
- Wireless multimedia systems, services and applications
